

cross-border network for Free Space Culture

> platform for free space culture

LX5 is a **platform for free space culture** (German 'FreiRaumKultur'). The aim of LX5 is a multidisciplinary network of artists from the Greater Region (Saar, Rhineland-Palatinate, Wallonia, Lorraine and Luxembourg). The LX5 network articulates itself around a **web-based culture server** self-managed by artists, a **radio show** as well as physically existing **meeting points**, such as a homebase and temporary intervention sites in the Greater Region. LX5 is launched by the cultural non-profit association *Installation LX*. The project takes place in the context of the European Capital of Culture 2007.

> objectives

Improve access to free space

When artists leave a predefined institutional framework, they look for appropriate project spaces, where they can develop new means of creation and artistic experimentation.

Facilitate the communication and coordination among artists

A better exchange of organisational know-how and concrete experiences between artists are essential for the use of free space and the development of a culture referring to it.

Act as an awareness-raising tool

The exchange between artists, event organisers and the public favours a 'grass roots culture' and stimulates public curiosity for the diversity and quality of artistic creation within the Greater Region.

Offer non-established artists a stepping stone

The networking of young artists crossing institutional barriers enables a common representation with higher impact and increases public visibility.

> spaces

'**LX5 homebase**' in Luxembourg-Hollerich is a meeting point, a showcase for artwork and a workspace for artists. This new collective art place accommodates two types of activities. Five collective exhibition projects take place in the '**LX5 expo space**': *L'écurie*, *multiplex*, *070707*, *Pop-Up-Shop*, and *mais oui...*. '**LX5 meeting space**' includes performance nights, workshops and an art info-space.

While '**LX5 homebase**' is the starting point for LX5 actions, the artists of the cross-border network also establish other **transitory meeting points** in various vacant places in Saarbrücken, Trier and Esch-Belval, which they temporarily use as 'new territories of art' (French 'nouveaux territoires de l'art').

> LX5.net

The culture server, as network tool for LX5, is an **Internet portal autonomously managed by artists from the Greater Region**. They can present themselves in their own virtual gallery. The website offers useful information: locations for events, project and partner search, agenda, tools for financial support and more. LX5.net is the virtual counterpart of real gatherings such as exhibitions, art collectives, workshops, cultural centres and informal contacts.

(A new version will be online by the end of March 2007.)

Programme 2007

Update: February 2007 (changes may occur)
